

INFRARED SPECTRA OF BENZENE-DIACETYLENE CLUSTERS:  $C_6H_6 \cdot C_4H_2$  and  $C_6H_6 \cdot (C_4H_2)_2$

CHRISTOPHER RAMOS, PAUL R. WINTER, and TIMOTHY S. ZWIER, *Department of Chemistry, Purdue University, West Lafayette, IN 47907-1393.*

Resonant two photon ionization spectra of the benzene:diacetylene 1:1 cluster have been taken across the  $6^1_0$  transition region of the cluster with time-of-flight mass spectrometry detection. IR/UV holeburning has shown that one of the peaks in the spectrum is the benzene:diacetylene 1:2 cluster. The resonant ion dip infrared spectra of both the 1:1 cluster and the 1:2 cluster have been recorded. Possible structures of these clusters will be discussed.
