

DESCRIPTION OF THE *FANTASIO* INSTRUMENTAL SET-UP

K. DIDRICHE, P. MACKO and M. HERMAN, *Laboratoire de Chimie quantique et Photophysique, CP160/09, Université Libre de Bruxelles (U.L.B.), Ave. F.-D. Roosevelt 50, Brussels, B-1050, Belgium.*

We have built a new set-up, named *FANTASIO*, for "Fourier trANSform, Tunable diode and quadrupole mAss spectrometers interfaced to a Supersonic expansIOn". Initial results will be reported, including the mapping of the jet expansion and the observation of acetylene clusters in the infrared spectral range.
